APPENDIX 1

COPY OF PAPERS  
ORIGINALLY FILED

Copies of claims 1 and 2 showing the insertions  
(underlining) and deletions (in brackets) are as below:

1. (Four Times Amended) A protective headgear  
equipped with an electroacoustic communication device  
comprising:

a case including:

5 an acoustic pick-up, and  
a speaker[,];

[the headgear further comprising:]

an integral external principle shell made of  
rigid material including two lateral wall portions  
10 covering and corresponding to zones occupied by ears of a  
user; and

connection means to removably attach and  
position said case inside of said principle shell in one  
of the zones occupied by the ear of the user, the  
15 connection means including:

a removable connection between the  
case of the communication device and the  
external principle shell [headgear].
